

Proactive Cell Banking

Proactive stem cell banking for a healthier tomorrow.

Store your pet's stem cells during routine surgery and secure access to future regenerative therapies — without extra procedures or ongoing fees.

PROCESS

Surgical Collection: Captures fat tissue during routine spay, neuter, or surgery.

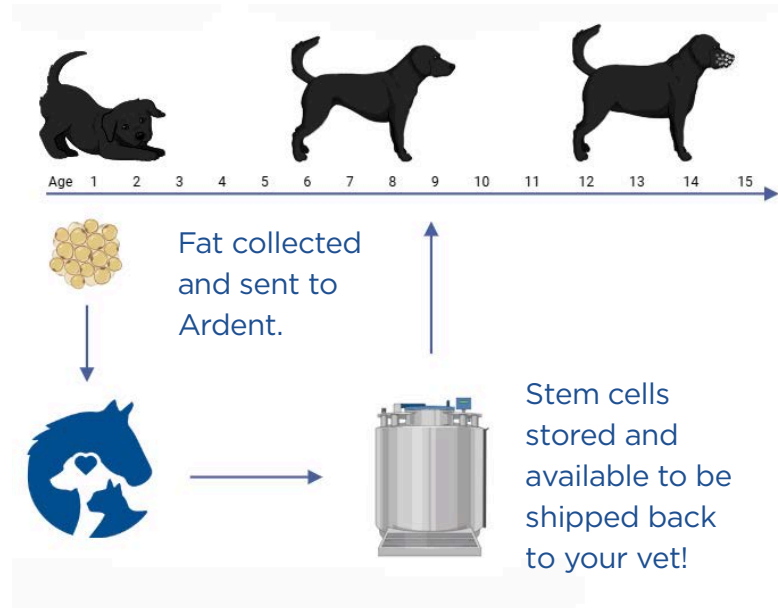

Professional Processing: Stem cells isolated by trained lab techs.

Lifetime Storage: Cells preserved in a cryotank for your pet's entire life.

All-Inclusive Service: Covers processing, shipping, and storage.

IMPACT AREAS

Preventive Care: Store healthy cells before problems arise.

Orthopedic Support: Use for arthritis, torn ligaments, and joint injuries.

Post-Op Recovery: Accelerates healing and reduces inflammation.

Senior Pet Support: Provides non-invasive therapy options later in life.

Breed-Specific Risk: Great for pets prone to degenerative conditions.

WHY BANK NOW?

Higher Quality: Younger tissue = healthier, more potent cells.

Cost-Effective: Pet owners may see up to 60% cost savings from proactive banking and therapy compared to collecting cells at the time of need.

Ready Access: Enables use of cell therapy when needed.

Future-Proof: Prepared for today's and tomorrow's regenerative therapies.

Peace of Mind: Gives you control over your pet's long-term care.
